Experience

Nov 2024 - Present Oman
Web & Graphic Designer
Nawat Solutions

Designed and developed websites and graphics to enhance client branding and user experience. Created logos, promotional materials, and branding assets based on client needs. Contributed to mechatronics projects by designing and prototyping systems that integrate electronics with mechanical components. Collaborated with the team to ensure timely delivery of high-quality designs and meet project goals.

Sep - Nov 2024 Bahrain
Integration Engineer
ANIS - SCIENTIA

Participated in the exhibition by showcasing a 360° radar system built with Arduino and ultrasonic sensors for real-time distance measurement and object tracking. Contributed to the development of a software interface to visualize sensor data and integrated it with the radar hardware. Collaborated with the team to refine detection algorithms, ensuring optimal system performance during the live demonstration.

Feb - Aug 2024 Bahrain
Front-End Developer
Sadam Gateway

Built and launched the company's official website, ensuring a seamless user experience and responsive design. Provided ongoing support for various tasks, addressing minor issues and updates as needed. Created HTML pages on demand, adapting to evolving project requirements. Assisted the team with technical solutions and contributed to maintaining the website's functionality and performance.

Jan - Nov 2023 Bahrain
Web Developer
Asserve Tech

Constructed and designed the company's personal website with a modern, user-friendly interface. Created various designs and websites under the company's name, enhancing client engagement and brand identity. Collaborated with clients to understand their needs and deliver customized, high-quality digital solutions, while providing creative direction and technical support throughout the development process.

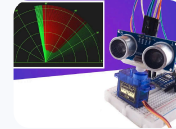

Latest projects

Nawat Solutions

A dynamic and responsive platform designed for versatile user experiences.
